

[Software/Java Engineer]

Are you passionate about software development, finding solutions and working as a team? Do you bring the heart and mind of a startup mentality? Do you want to work with cutting edge B2B solutions together with a team of 20 rock stars in the busy global Internet of Things space - then this is the job for you.

Yanzi is expanding its core engineering team and is looking for software engineers with relevant Java knowledge. You should have a relevant university degree and have excellent teamwork capabilities.

Your responsibilities will be to:

- Together with the engineering team develop and maintain scalable, robust and maintainable software
- Take ownership of certain sub systems of the Yanzi IoT Platform
- In cooperation with the engineering team always strive for the best solutions
- Deliver high quality products

You will report directly to the Software Manager of Yanzi Networks and you will work from the Yanzi Head Quarters based in Kista, Sweden.

Competencies:

- Driven, pro-active and focused on the solutions
- Committed and passionate about system development
- Positive and a responsible team player
- Tolerant to stress and rapid changes
- Structured and analytical
- Fluent in English, both writing and speaking

Meriting Experience:

- Java and Object oriented programming
- Docker, Jenkins and Kubernetes
- Technical documentation in English
- Distributed systems and network programming
- JavaScript/HTML/CSS, XML
- ObjectiveC/iOS and Android
- System and software test
- C and embedded programming
- Unix/Linux

Education:

- Master of Science or equivalent studies

Are you interested in applying for the role?

Send your CV and a personal letter to: marie.lassborn@yanzinetworks.com

About Yanzi Networks

Yanzi Networks has developed an open, fast, robust and evolutionary software and networking platform for IoT. Yanzi collaborates with the industry's largest vendors in order to deliver value to the real estate owners and facility management companies who wish to enter the world of Smart Buildings. Yanzi Networks AB is a venture financed company with headquarters in Kista, Sweden.
