

Production Engineer

Are you passionate about electronic production, procurement, and working closely with suppliers and manufacturing facilities around the world? Do you bring the heart and mind of a startup mentality? Do you want to work with cutting edge IoT solutions together with a team of 20 rock stars in the busy global Internet of Things space - then this is the job for you.

Yanzi is looking for an ambitious person who likes things in order and with relevant experience from supply chain, purchasing, production, and quality engineering/management to join our team. You are technically interested and enjoys working in an international environment. Enjoys working together with our team and suppliers to continuously enhance and optimize production, processes, and quality.

Your responsibilities will be:

- Primary owner of the supply chain in Sweden and China
- Manage existing suppliers to ensure delivery schedule, quality, and cost
- Identify and develop competitive, reliable, and scalable supply partners
- Negotiate supply contracts to ensure competitive quality, lead time, and cost.
- Continuously work with team and suppliers to improve process, lead time, quality, and cost
- Manage forecast and order process towards suppliers
- Ensure new products are optimized for production and plan for production of new products

You will report directly to the executive management team of Yanzi Networks and you will work from the Yanzi Head Quarters based in Kista, Sweden. Traveling may be required, primarily to Shenzhen and Shanghai, China.

Competencies:

- You enjoy to keep things in order
- You put quality into everything you do
- You are self-motivated, pro-active, and focused on the solutions - Tolerant to stress and rapid changes
- You are a positive and a responsible team player - Fluent in English, both writing and speaking

Experience:

- You have 2 - 7 years' experience from supply chain, purchasing, production, or quality management in the field
- You have commercial and technical knowledge and genuine interest in different aspects of sourcing, manufacturing, and quality engineering

Education:

- Bachelor or equivalent degree

Are you interested in applying for the role?

Send your CV and a personal letter to: stefan.sandhagen@yanzinetworks.com

About Yanzi Networks

Yanzi Networks has developed an open, fast, robust and evolutionary software and networking platform for IoT. Yanzi collaborates with the industry's largest vendors in order to deliver value to the real estate owners and facility management companies who wish to enter the world of Smart Buildings. Yanzi Networks AB is a venture financed company with headquarters in Kista, Sweden.
